### Search Notes

Dear Hussein Akhavannik,

Please find attached the search results for 09/784391. I used the search strategy I emailed to you to edit, not hearing from you I proceeded. I searched the standard Dialog files, IEEE, and the internet.

If you would like a re-focus please let me know.

Thank you.

Pamela Reynolds

...Access Protocol (SOAP) to communicate with a client device, will soon debut as a secure **e - mail** policy server for Microsoft Exchange messaging environments. With encryption algorithms and key technology, Policy Manager

permits enterprises to centrally enforce company policy for retention or destruction of **electronic documents** . Policy Manager can set expiration dates for messages where a copy is sent or forwarded...

...copying, and printing of proprietary messages, say Omniva's spokespeople, and also includes a company **confidential** feature that restricts messages to transport inside a business. Eric Hahn, chair of Omniva, says **e - mail** policy management has come into its own after three decades of **e - mail** development focusing on improved digital message exchange. Because it is built atop Microsoft .NET, Omniva Policy Manager Enterprise Edition can closely integrate with installed **e - mail** systems and security infrastructure, including Microsoft Exchange and Active Directory. One user will be an industrial and medical gases supplier that does almost all its business through **e - mail** . It needs to be able to destroy documents in compliance with a central corporate policy.

A discussion covers the ethics of counseling legal clients over the Internet. Use of **e - mail** as a way to communicate for client counseling is covered, along with **e - mail** status under the doctrine of attorney-client privilege. A related topic is the use of **e - mail** and its consistency with attorneys' ethical obligations to maintain confidentiality of communications with clients. This includes the **sending** of **e - mail** messages by ordinary methods or whether particular security precautions, including encryption, are required to comply...

...American Bar Association and ethics committees in multiple jurisdictions that have handed down decisions on **e - mail** communication with clients. Attorneys use **e - mail** for convenience and practicality and to speed communications. One of the most important reasons for using **e - mail** is that clients are demanding it. However, there are security concerns with **e - mail** communications, since the Internet is not a 'confidentially secure mode of **transmitting** information.' Unauthorized interception of **e - mail** is a crime under the Electronic Communications Privacy Act of 1986 (ECPA), and ECPA makes it a federal offense to intercept, tamper with, or disclose electronic communications. To protect **confidential e - mail transmissions** , lawyers are advised to deploy firewalls; use virus scanning

and protection software; change access codes for Internet connectivity; and establish **direct** modem links or leased dedicated private phone lines for communication over closed lines instead of...

**TITLE:** Watermark Enterprise keeps you afloat in sea of paper

Watermark Software's now FileNet's **Watermark Enterprise 2.1** offers a Windows-based document image management solution. **Watermark Enterprise Edition** is one of four programs in the **Watermark Enterprise** series. With it, users enjoy document imaging that can be integrated into several types of applications, including databases, workflow programs, and **e - mail**. By itself, the product can be used for a number of tasks, including unstructured indexing, low-volume imaging, and application integration. When used with the **Watermark Enterprise Image Server**, **Watermark Enterprise** can accommodate production imaging, workflow, structured indexing, and more. A Hierarchical Storage Manager is...
